Appendix Invitation

Workshop regarding guidance of the Nagoya protocol and EU ABS regulation for Swedish users of genetic resources

When: December 1st. 9.30-15.00

Where: The workshop will be held as a webinar on Zoom. During the webinar you will be able to chat with the speakers.

Why: As of 2016 researchers at SLU and other universities who utilize genetic resources and traditional knowledge from other countries around the world need to do the declaration of this usage in agreement with the rules stipulated by the Nagoya protocol and the EU ABS-regulation. Otherwise you may not be able to receive research funding from several research funding agencies.

Who: To help SLU researchers adhere to the Nagoya protocol the SLU vice-chancellor has appointed a Nagoya working group, and we now invite on a national basis scientists, prefects and other interested to a workshop during which we will inform about the Nagoya protocol and its implementation, internationally and here at SLU. Prior to the event participants are expected to be familiar with the basics of the Nagoya protocol and the EU ABS regulation concerning access and benefit sharing see: <https://www.naturvardsverket.se/Miljoarbete-i-samhallet/Miljoarbete-i-Sverige/Uppdelat-efter-omrade/Nagoyaprotokollet/>
