

# Configure Mac OSX for secure wireless access

The following instructions will enable you to connect your Mac to eduroam, the secure wireless network.

## Configuration instructions

1. Click the wireless logo at the top right corner of your screen, select "eduroam".

2. Enter your username followed by @ad.slu.se.

3. Click Continue to approve the certificate.

4. Approve the changes to the certificate trust settings by entering your osx credentials and you should now be connected to eduroam.
