

***Come to SLU, Ultuna on the 25<sup>th</sup> of November 2022 and learn more about ...***

## ***Obstacles and opportunities for management of permanent grasslands in Sweden!***

SLU and the SUPER-G Horizon 2020 project ([SUPER-G – Sustainable Permanent Grassland](#)) are organising a knowledge exchange event as part of the project's European 'summer school' program. In Sweden, we will have **a one-day learning event at Ultuna campus on the 25<sup>th</sup> of November (Winter School)** with 3 lectures and group discussions **in Swedish**. Activities will run from **09:00 until 16:00**.

All stakeholders with an interest in grasslands are welcome including: farmers, researchers, students, educators, NGOs, government, supply chains etc.

Lectures and group discussions will be based on three core themes:

1. Biodiversity, conservation and ecosystem services
2. Obstacles and opportunities facing farmers using semi-natural grasslands
3. Perceptions of farmer identity as environmental heroes and environmental villains

Lectures and group discussions will be led by Anna Hesse, Hanna Bergeå and Matt Hiron from SLU. Other people may be added as content developers!

Register by the 10th of November at <https://www.slu.se/grasmarker>. More detailed information will be sent out via email to registered participants closer to the date. For more information please contact Matt Hiron [matthew.hiron@slu.se](mailto:matthew.hiron@slu.se)
